Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-6 are rejected under 35 U.S.C. 102(e) as being anticipated by Ford 6,349,852.

Ford discloses a beverage producing apparatus (10) for controllably combining a concentrate and a dilution material to produce a beverage, which comprises means for delivering concentrate (40), means for delivering dilution material (60), a controller (80) operatively coupled to and operatively controlling the concentrate delivering means and the dilution material delivering means, means for detecting (84) conductivity, the conductivity means being operatively coupled to the controller for providing conductivity information relating at least a mixture of the concentrate and dilution material (col. 12, ll. 27-44), the controller operatively controlling the dispensing of concentrate and dilution material to maintain the conductivity of the mixture in a desired conductivity range (col. 7, ll. 32-67 onto col. 8, ll. 1-63).

The device shown by Ford will perform the method recited in claims 2 and 5 during normal operational use of the device.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Bertone 6,419,120, Struminski et al. 6,202,894 and Lowe 7,036,687 disclose other types of beverage producing apparatus.
4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Frederick C. Nicolas whose telephone number is (571)-272-4931. The examiner can normally be reached on Monday - Friday from 9:00 AM to 5:00 PM.
